Local Government Reform from Jill Merker

My thoughts on reforming Local Government:

Heritage:
Some Local Governments are attempting to remove or at best dilute Heritage Protection. This must be stopped. It’s simply an obvious attempt by developers to bowl over everything from our past and create monster blocks – the slums of the future all in the name of short term profit for the greedy.

Elections:
Local Government elections postal votes should be changed to the same process as state and federal elections. Voters should be able to vote in person at the council office or at a council library three weeks up to election day. Stealing if voting papers from mail boxed is widespread.

Local Government elections should be compulsory as it is for Federal Elections

Councillor candidates:
Anyone who could directly or indirectly benefit from being a Councillor should not be allowed to stand for election e.g., anyone associated with building, planning, Real Estate Agents or property developers.

Council meetings and Council Staff:
Public Question time should not be time limited

Credit cards statements for all Local Government employees should be tabled at council meeting and made available for inspection by everyone in the community.
The Local Government Act amended to cover Covid emergencies (Part 10) **should now be** revoked. Extended powers given to CEO’s is no longer required.

**Development Assessment Panel:**

Issues that appear before DAP include objections from members of the public. Currently the general public have no right to attend a DAP hearing. Developers are therefore favoured. **This must be addressed.** I understand many other States allow public presentations at similar hearings.
