

To whom this may concern

When calling for public submission's with referring to changing the laws to do with Breeding Dogs. It is very miss leading calling such as STOP PUPPY FARMING. The wording Stop Puppy Farming as most others and I would see it. Is your trying to change the laws of people breeding large amounts of dogs and puppy's in kennels and cages

Not someone that occasionally breeds in a homey environment. The wording Puppy Farms is dogs locked in Cages and Kennels and lots of them for breeding and not living a life apart from that.

I have been breeding dogs for 25 years with my family pets. They are not locked in kennels or cages. They are a big part of my family. I live on a lot of acres, so where I' am they are always with me, Living a happy life with my horses, cats, chickens and my children. Loving life playing and having a great time all day every day.

I keep in contact with a lot of people that have got my Puppies from me and get to watch their life and how happy my puppies have made families.

When a family is looking to purchase a puppy those days. They do a lot of research on a breeder. They are looking for someone that breeds pups in a home Family environment and are not locked in kennels and cages and are brought up with a family. That is how they want their pups to be brought into this world.

I don't think the way your trying to change the law is the right way to go about it. Yes Stop Pet shops from selling them because if you need to sell your pups in a pets shop. There is something not right about your breeding. And when the people cant sell them to pet shops anymore. They will have to stop breeding.

If you change the law in this way you're saying. The only puppy's that will be born are ones locked in kennels and cages. Don't think the so-called registered breeders do the right thing either. They just have a piece of paper that says they are a registered breeder but they are mostly breeding them in kennels and cages not a family environment.

Another thing is DESEXING puppy's before they are 6 months of age is Inhumane and CRUEL. It can cause:

Infantile External Genitalia, Cystitis in Dogs, Urinary Problems, Urinary incontinence in Female Dogs, Infectious disease, Potential Long Team risks, Behaviours Problems, Musculoskeletal development.

By passing this law it will end up making the family Puppy too expensive to buy for a normal family. This will make a lot of family's having to grow up and live their life without the family Dog. Do you really think that would be right? Go down to the park on the weekend and watch the love people have for their family's Fur Baby it's unbelievable. They are the other members of the family

Families will end up having to get their pups from placers like China, Now Google that. Its not very nice

I really think there is a better way to do something about the wrong people that breed puppies.

Thank you for reading this and hope you understand where I am coming from
